Gold Coast Waterways Authority is working on behalf of the State Government to increase the capacity of the Muriel Henchman Park Pontoon.

It's all part of our plan to reduce congestion and improve access for all waterways users!

Located at The Spit, this project involves:
- Adding a 2nd module (12m x 4m) on the southern side of the existing pontoon
- Relocating the southern fender/mooring pile to service the new pontoon
- Correcting the existing pontoon's listing to provide a more level surface

A detailed sketch plan is available overleaf. An update on timing for the works will be provided once the design and approvals are completed and the construction contract has been awarded.

Benefits
- Reduce congestion at the pontoon
- Increase capacity of structure for more vessels to utilise
- Improve access to the Broadwater and surrounding waterways
- Support local businesses that utilise our waterways

Alternative pontoons available during construction
Alternative pontoons available during the construction works period include Southport Broadwater Parklands, Surfers Riverside, Proud Park, Cavill Avenue and Evandale Park. Operating times for these pontoons can be found at the following link:

Delivering our plan to
Sustain, Enhance & Promote
the Gold Coast waterways

Sketch Plan - Muriel Henchman Park Pontoon Upgrade

- Muriel Henchman Park
  Lot 1 / Plan SP104014
- Address
  Muriel Henchman Drive
  Main Beach, QLD 4217

- Design, manufacture and install a new 12m x 4m pontoon module with two 'in board' structural support piles at the rear of the new pontoon
- Provide additional floatation for the existing pontoon module to correct listing
- Relocate the southern fender/mooring pile to service new pontoon module
