Muriel Henchman Park Pontoon Upgrade
Project Fact Sheet

Gold Coast Waterways Authority is working on behalf of the State Government to increase the capacity of the Muriel Henchman Park Pontoon.

It's all part of our plan to reduce congestion and improve access for all waterways users!

Located at The Spit, this project involves:
- Replacement of the existing pontoon with a larger pontoon module (24m x 4m)
- Relocating the southern fender/mooring pile to service the new pontoon
- Correcting the existing pontoon's listing to provide a more level surface

A detailed sketch plan is available overleaf. An update on timing for the works will be provided once the design and approvals are completed and the construction contract has been awarded.

Benefits
- Reduce congestion at the pontoon
- Increase capacity of structure for more vessels to utilise
- Improve access to the Broadwater and surrounding waterways
- Support local businesses that utilise our waterways

Alternative pontoons available during construction
Alternative pontoons available during the construction works period include Southport Broadwater Parklands, Surfers Riverside, Proud Park, Cavill Avenue and Evandale Park. Operating times for these pontoons can be found at the following link:
