

Improving safe access to Biggera Creek and enhancing the foreshore

Delivering our plan to *Sustain, Enhance and Promote* Gold Coast Waterways

Concept

Planning

Consultation

Construction

Operation

The Gold Coast Waterways Authority (GCWA) is investing \$35.3 million in projects over four years to sustain, enhance and promote our waterways.

About the Project

Sand deposits that are silting up Biggera Creek are to be removed and placed on adjacent foreshores to restore the beaches.

Work will be undertaken in two sections as shown on the map overleaf:

- 1 – Ryder Park
Beach replenishment between the Ray Street boat ramp and the bridge
- 2 – Marine Parade
Beach replenishment along approximately 700m from Lands End to Parr St

Dredging will achieve the desired navigation channel profile for a safe and healthy waterway. Sand will be used to replenish the beach next to the boat ramp and along the Broadwater foreshore, providing better access to utilise the facilities of the area.

Dredging works are scheduled to take approximately three (3) weeks and will operate between 7am and 4pm from Monday to Saturday.

Benefits to the community

- Improve nautical safety and ease of navigation
- Improve access for vessels using the Ray Street boat ramp
- Enhance the Broadwater foreshore for recreational use
- Ensure sustainable management of Gold Coast waterways.

Biggera Creek Project - Fast facts*

Location	Biggera Creek and Broadwater foreshore
Cost	\$200,000
Start	January 2016
Completion	February 2016
Status	<ul style="list-style-type: none"> ● Approvals obtained ● Detailed design completed ● Dredging commenced

**May be subject to change*

Please note: No machinery and or equipment will be on site over the Christmas / New Year period from 22/12/2015 to 11/01/2016.

About us

The Gold Coast Waterways Authority (GCWA) is the Queensland Government Agency responsible for improving access to and managing the waterways as well as ensuring that the waterways continue to be a great asset available to residents, visitors and businesses on the Gold Coast.

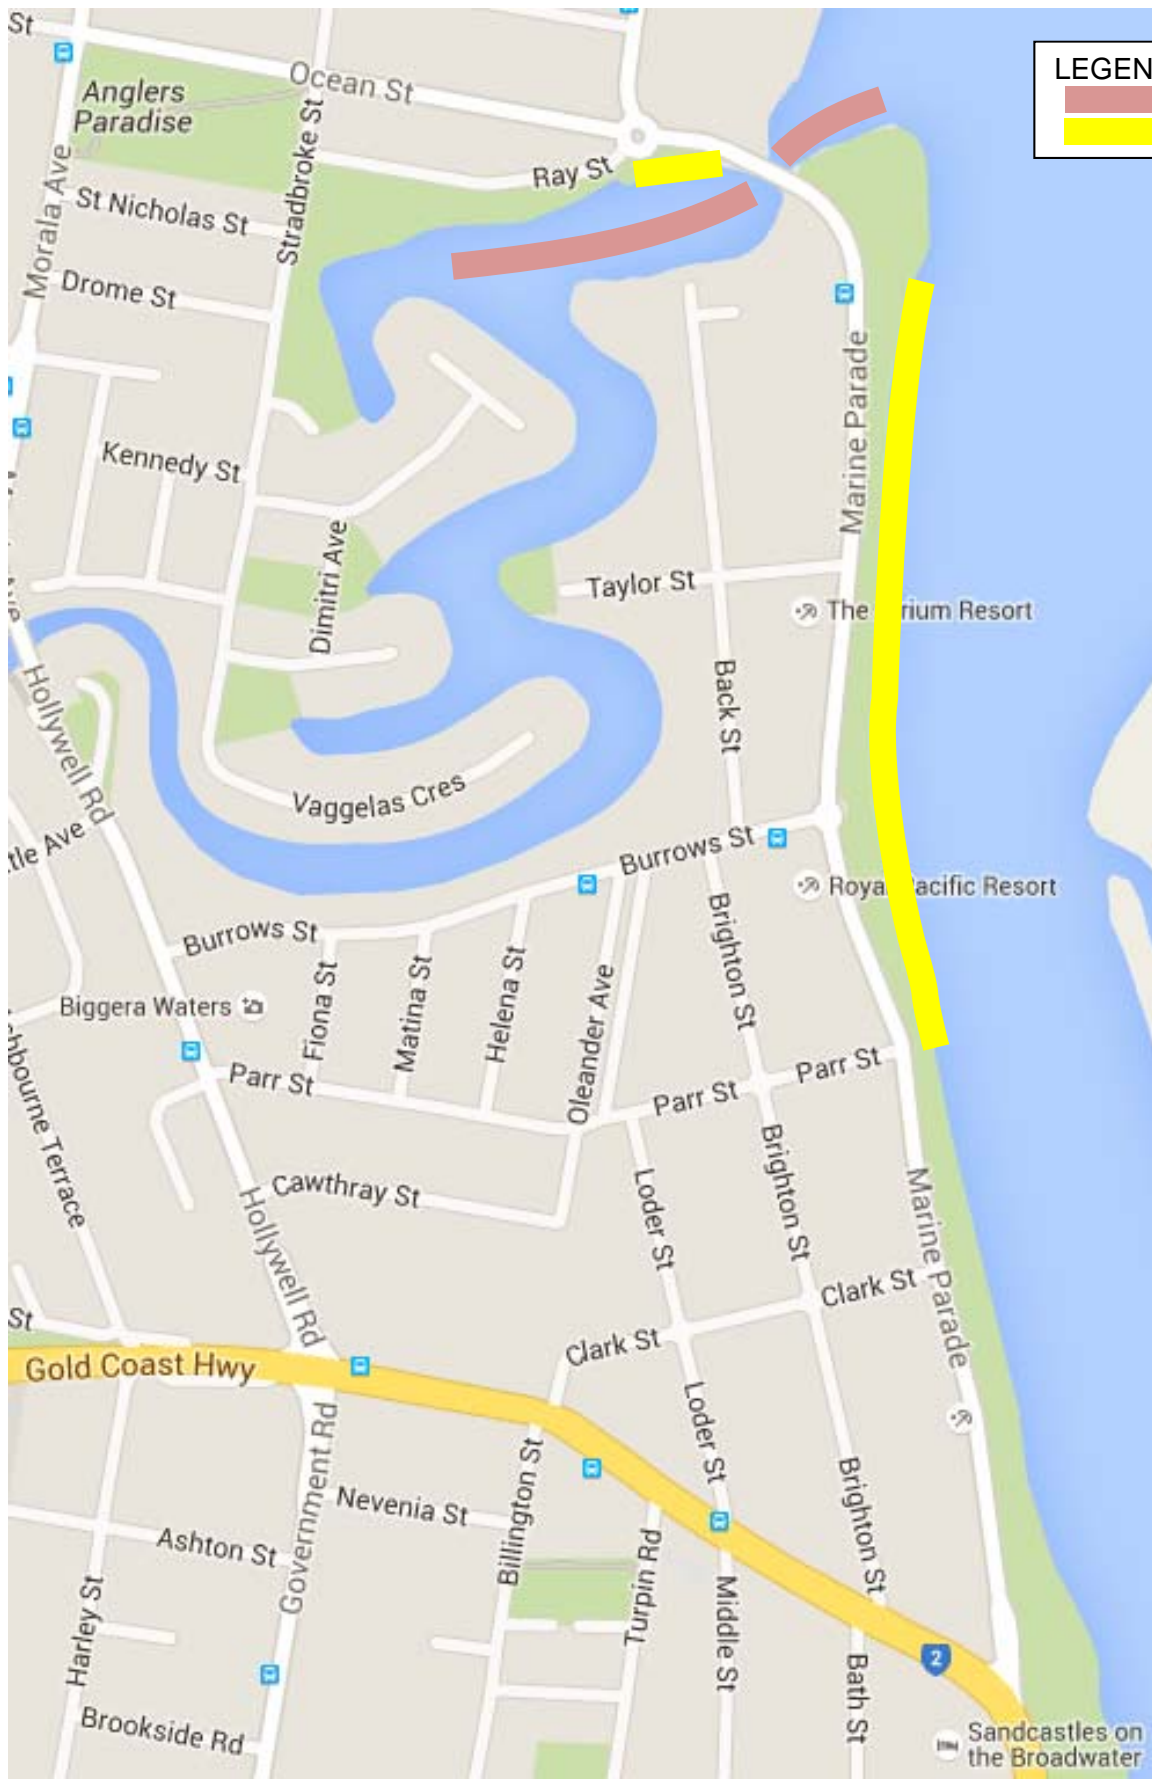

Our Vision

A waterways network (and relevant facilities and reserves) that is sustainably managed to reflect and support an appropriate balance between the recreational, tourism, environmental, economic development and commercial aspirations and objectives of the Gold Coast community and visitors.
