

## PROJECT FACT SHEET

# Jacobs Well Infrastructure Upgrade Project

The Gold Coast Waterways Authority is upgrading the boat ramp, pontoon and jetty at Jacobs Well to improve access to the Moreton Bay Marine Park. The current boat ramp will be moved to accommodate vessels with deeper draughts and upgraded with a new floating walkway, the existing pontoon will be demolished and a replacement built nearby, and the jetty will be replaced. Once complete, the project will improve capacity to help manage peak periods at the Jacobs Well boat ramp.

## Benefits:

- Improved capacity from four 3.5m boat ramp lanes to four 4m boat ramp lanes (including a new floating walkway)
- The new floating walkway will improve the launching and retrieving of vessels
- Improved safety and access by relocating the pontoon. The current pontoon will be demolished as it's reached the end of its useful life, however, parts of it will be reused for the new pontoon. The new pontoon structure will improve efficiency, reduce conflict and provide an improved boat queuing facility
- Relocation of pontoon will provide a dedicated facility for deep draught vessels
- Current jetty will be demolished and replaced with a new reinforced concrete jetty with aluminium handrails

## Impacts:

- Temporary closure of some facilities while upgrade works are completed
- Access limitations during works period due to barges, piling rigs, excavators, trucks and other construction equipment in the waterway, on the foreshore and in the car park
- Reduced capacity at the boat ramp during works period
- Noise impacts from demolition, construction and piling

## Alternative boat ramps, jetties, pontoons & fishing facilities nearby:

[Visit the City of Gold Coast's website here.](#)

## LOCATION

Lions Park, Jacobs Well,  
Gold Coast

## KEY DETAILS

**Planned Investment:**  
\$1,755,000

**Est. Construction Start:**  
February 2021

**Est. Construction Completion:**  
End of November 2021

**Current Status:**  
Construction
