

Fast Facts Jacobs Well mooring area

ABOUT: The Jacobs Well mooring area is a category 3 area located southern Moreton Bay near the community of Jacobs Well within a designated mooring area (DMA) of the Moreton Bay Marine Park.

CURRENT MOORINGS IN THE AREA: Healthy Land & Water delivered a project to replace traditional buoy moorings with environmentally friendly moorings in 2019. There are currently 18 environmentally friendly moorings in the area. This is the first area to be totally "EFM" compliant.

FUTURE CAPACITY: For this mooring area, there may be opportunities for up to an additional 21 new environmentally friendly moorings but this will depend upon the type, length and draft of the moored vessels.

Note: The establishment of buoy moorings in this area may be affected by several factors, such as preservation of the channel for navigation, access around the swimming enclosure, distance requirements for operational speed limits, environmental values of the marine park, sand movements and shoaling, other water traffic, and future marine development.
